**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In all the claims, brackets such as "[ ]" should not be used or replaced with other suitable punctuation marks because brackets in United States patent application normally means the materials or words inside the bracket are deleted. Lower case letters, other than the beginning, should be used in a claim.

In claim 1, line 4, "said rendered color space" lacks proper antecedent basis.

In claim 1, lines 7-8, the phrase "said color information then newly derived from said extraction frames and said interpolated frames" is not clear whether it is performed by the earlier extracting step(s) or another new step. Clarification is required.

In claim 15, lines 8-9, the phrase "said color information then newly derived from said extraction frames and said interpolated frames" is not clear whether it is performed by the earlier extracting step(s) or another new step. Clarification is required.

In claim 18, page 28, lines 5-6, the phrase "said color information then newly derived from said extraction frames and said interpolated frames" is not clear whether it

is performed by the earlier extracting step(s) or another new step. Clarification is required.
